INTERNATIONAL OIL SUMMIT

jointly organized with *IFP, Petrostrategies and SPTEC*

The *International Oil Summits*, held in Paris since 1999, have been recognized as large successes.

Each conference has brought together more than 200 participants, including ministers, prominent corporate leaders and journalists.

The previous editions of the Summit were particularly successful, and attracted 90 journalists and several television networks. The presentations of over 20 distinguished speakers provoked constructive discussions concerning a wide range of issues confronting the oil industry.

In 2008, as in the previous summits, oil ministers and CEOs of leading oil companies such as BP, ENI, Exxon, Mobil, National Oil Companies, Repsol YPF, Shell, Total, ... are invited to take part.

The topics covered in the *International Oil Summit* include the following:

OIL SUPPLY AND DEMAND

The oil market. Competition between oil and other energy sources

The impact of technological advances on production and processing costs

Outlook for growth in oil supply in the current price climate

Demand in the 21st century and the share of oil in the global energy market in the face of competition and environmental constraints

PRODUCING COUNTRIES

With the participation of ministers from the main oil producing countries

INTERNATIONAL OIL COMPANIES, NATIONAL OIL COMPANIES, OIL SERVICES COMPANIES

With the participation of CEOs and senior executives

Oil industry developments (mergers and acquisitions) and their impact on costs

How improved technological progress, organization and management can contribute to the reduction of costs

Possible cooperation strategies between producing countries and international companies

OPEC/non-OPEC relations and producer-consumer dialogue

Cooperation/competition between oil and oil services companies

CURRENT ISSUES

Oil prices, oil reserves, oil production
